# **FQB44N10 N-Channel QFET® MOSFET**

100 V, 43.5 A, 39 m $\Omega$ 

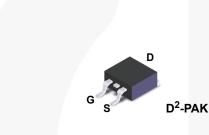

## Description

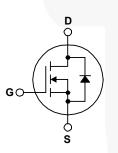

This N-Channel enhancement mode power MOSFET is • 43.5 A, 100 V,  $R_{DS(on)}$  = 39 m $\Omega$  (Max.) @ V<sub>GS</sub> = 10 V, produced using Fairchild Semiconductor's proprietary planar stripe and DMOS technology. This advanced MOSFET technology has been especially tailored to reduce on-state  $I_D = 21.75 \text{ A}$  Low Gate Charge (Typ. 48 nC) resistance, and to provide superior switching performance • Low Crss (Typ. 85 pF) and high avalanche energy strength. These devices are suitable for switched mode power supplies, active power • 100% Avalanche Tested factor correction (PFC), and electronic lamp ballasts.

### Features

- I<sub>D</sub> = 21.75 A

- 175°C Maximum Junction Temperature Rating

#### Absolute Maximum Ratings T<sub>c</sub> = 25°C unless otherwise noted.

| Symbol                            | Parameter  |                   | FQB44N10TM  | Unit |

Notes:

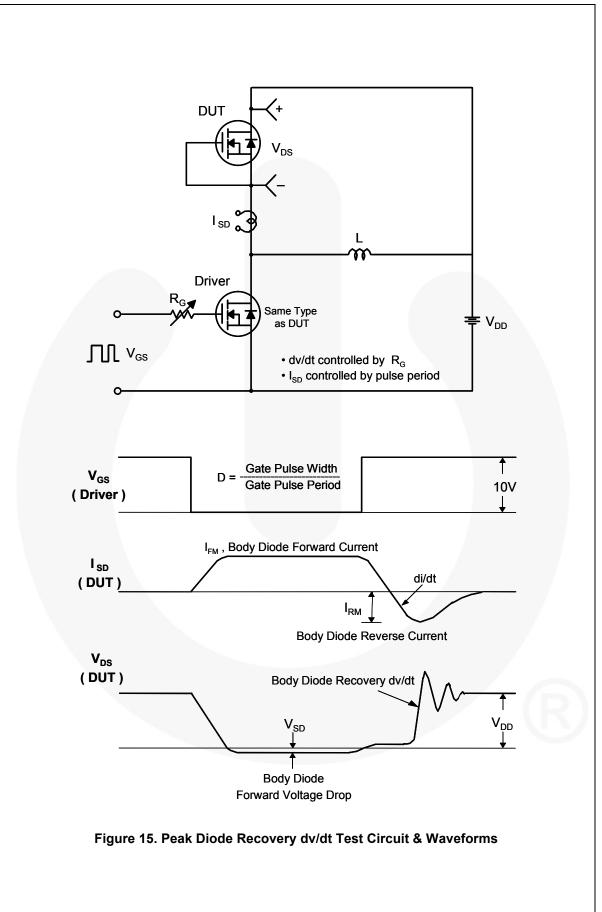

1. Repetitive rating : pulse-width limited by maximum junction temperature. 2. L = 0.42 mH,  $I_{AS}$  = 43.5 Å,  $V_{DD}$  = 25 V,  $R_G$  = 25  $\Omega$ , starting  $T_J$  = 25°C. 3.  $I_{SD} \le 43.5$  Å, di/dt  $\le 300 \text{ A/}\mu\text{s}$ ,  $V_{DD} \le BV_{DSS}$  starting  $T_J$  = 25°C. 4. Essentially independent of operating temperature.

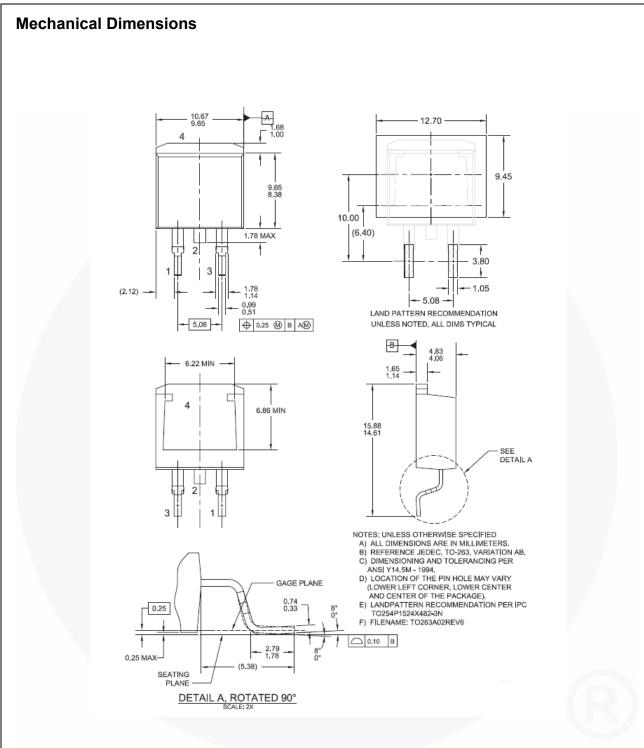

FQB44N10 — N-Channel QFET<sup>®</sup> MOSFET

## Figure 16. TO263 (D<sup>2</sup>PAK), Molded, 2-Lead, Surface Mount

Package drawings are provided as a service to customers considering Fairchild components. Drawings may change in any manner without notice. Please note the revision and/or date on the drawing and contact a Fairchild Semiconductor representative to verify or obtain the most recent revision. Package specifications do not expand the terms of Fairchild's worldwide terms and conditions, specifically the warranty therein, which covers Fairchild products.

Always visit Fairchild Semiconductor's online packaging area for the most recent package drawings:

FQB44N10 — N-Channel QFET<sup>®</sup> MOSFET

| Advance Information      | Formative / In Design | Datasheet contains the design specifications for product development. Specifications may change in any manner without notice.   |
|--------------------------|-----------------------|---|
| Preliminary              | First Production      | Datasheet contains preliminary data; supplementary data will be published at a later date. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve design. |
| No Identification Needed | Full Production       | Datasheet contains final specifications. Fairchild Semiconductor reserves the right to make changes at any time without notice to improve the design.   |
| Obsolete                 | Not In Production     | Datasheet contains specifications on a product that is discontinued by Fairchild<br>Semiconductor. The datasheet is for reference information only.   |
