

## AUIRFR8401 AUIRFU8401

40V

**3.2m**Ω

4.25mΩ

100A①

100A

#### Features

- Advanced Process Technology •
- New Ultra Low On-Resistance
- 175°C Operating Temperature •
- Fast Switching ٠
- Repetitive Avalanche Allowed up to Timax
- Lead-Free, RoHS Compliant
- Automotive Qualified \*

### Description

Specifically designed for Automotive applications, this HEXFET® Power MOSFETs utilizes the latest processing techniques to achieve low on-resistance per silicon area. This benefit combined with the fast switching speed and ruggedized device design that HEXFET power MOSFETs are well known for, provides the designer with an extremely efficient and reliable device for use in Automotive and a wide variety of other applications.

#### Applications

- Electric Power Steering (EPS)
- **Battery Switch**
- Start/Stop Micro Hybrid
- Heavy Loads
- **DC-DC Converter**

### **Absolute Maximum Ratings**

Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only; and functional operation of the device at these or any other condition beyond those indicated in the specifications is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability. The thermal resistance and power dissipation ratings are measured under board mounted and still air conditions. Ambient temperature (TA) is 25°C, unless otherwise specified.

			31			T <sub>J</sub> = 125°C
I <sub>RRM</sub>	Reverse Recovery Current		1.6		Α	T <sub>J</sub> = 25°C

Notes:

① Calculated continuous current based on maximum allowable junction temperature. Bond wire current limit is 100A by source bonding technology. Note that current limitations arising from heating of the device leads may occur with some lead mounting arrangements. (Refer to AN-1140)

- ② Repetitive rating; pulse width limited by max. junction temperature. (See fig. 11)
- $\$  Limited by T<sub>Jmax</sub>, starting T<sub>J</sub> = 25°C, L = 0.037mH, R<sub>G</sub> = 50 $\Omega$ , I<sub>AS</sub> = 60A, V<sub>GS</sub> =10V.
- $\label{eq:ISD} \textcircled{$ I_{SD} \leq 60A, \ di/dt \leq 918A/\mu s, \ V_{DD} \leq V_{(BR)DSS}, \ T_J \leq 175^\circ C. $ } }$
- 6 Coss eff. (TR) is a fixed capacitance that gives the same charging time as Coss while VDS is rising from 0 to 80% VDSS.
- ⑦ C<sub>oss eff</sub>. (ER) is a fixed capacitance that gives the same energy as C<sub>oss</sub> while V<sub>DS</sub> is rising from 0 to 80% V<sub>DSS</sub>.
- When mounted on 1" square PCB (FR-4 or G-10 Material). For recommended footprint and soldering techniques refer to
- application note #AN-994 (9)  $R_{\theta}$  is measured at T<sub>J</sub> approximately 90°C.

In this value determined from sample failure population, starting  $T_J = 25^{\circ}C$ , L=0.037mH,  $R_G = 25\Omega$ ,  $I_{AS} = 60A$ ,  $V_{GS} = 10V$

# Notes on Repetitive Avalanche Curves , Figures 14, 15:

(For further info, see AN-1005 at www.infineon.com)

1. Avalanche failures assumption:

- Purely a thermal phenomenon and failure occurs at a temperature far in excess of T<sub>jmax</sub>. This is validated for every part type.
- 2. Safe operation in Avalanche is allowed as long as Tjmax is not exceeded.
- 3. Equation below based on circuit and waveforms shown in Figures 22a, 22b.
- 4. PD (ave) = Average power dissipation per single avalanche pulse.
- 5. BV = Rated breakdown voltage (1.3 factor accounts for voltage increase during avalanche).
- 6. Iav = Allowable avalanche current.
- 7.  $\Delta T$  = Allowable rise in junction temperature, not to exceed T<sub>jmax</sub> (assumed as 25°C in Figure 13, 14).
  - tav = Average time in avalanche.

D = Duty cycle in avalanche = tav ·f

ZthJC(D, tav) = Transient thermal resistance, see Figures 13)

$$\begin{split} \textbf{P}_{D (ave)} &= 1/2 \text{ ( } 1.3 \cdot \textbf{BV} \cdot \textbf{I}_{av} \text{)} = \Delta T / \textbf{Z}_{thJC} \\ \textbf{I}_{av} &= 2\Delta T / \text{ [ } 1.3 \cdot \textbf{BV} \cdot \textbf{Z}_{th} \text{]} \\ \textbf{E}_{AS (AR)} &= \textbf{P}_{D (ave)} \cdot \textbf{t}_{av} \end{split}$$
